

SCREEN DEALING BULLETIN NO. 14/00

SYCOM Trading Halt

Following the failure of the SYCOM® IV Account Position Tracker at 12:08pm, the SFE and NZFOE Markets were halted for a period of 12 minutes before resuming at 12:20pm.

After recovering the System a subsequent failure occurred at 1:05pm. At this point the Exchange decided to stop and start the system in order to re-initialise all system components, trading then recommenced at 1:30pm.

This incident is being fully investigated by the Exchange and it's developers with the highest priority.
