

## SFE NOTICE NO.

125/08

Date of Issue: 15 September 2008  
Effective Date: 1 November 2008

---

## SFE Market Access Charges

Participants are advised of the following changes to fees related to the provision of international network and services. The new charges will be effective from 1 November 2008.

The fee changes outlined below result from increased costs associated with the upgrade to the international network currently underway. This upgrade will deliver a significant increase in bandwidth and resilience at each international hub and individual site connection. The entire upgrade is expected to be complete by the end of October 08.

The major changes are as follows:

### International Access

- International network bandwidth charges will be standardised across all hub locations
  1. Connections from a CBD location will be \$1850 (ex gst)
  2. Connections from a non-CBD location will be \$3700 (ex gst)
- The network bandwidth charges for all new sites are effective immediately
- The network bandwidth charges are effective for all existing sites from 1 November 2008

### International Cancellations

- International connections will be initiated with a 3 year agreement. Cancellation fees will be as follows:
  1. Cancellations within 12 months will be \$22,000 (ex gst)
  2. Cancellations within 12-36 months will be \$6,000 (ex gst)

### Access Infrastructure

- There is no change to the current hub, router and switch charges. However the costs will be consolidated into a single "network infrastructure" charge of \$710 (ex gst) on invoices for market access
- There is no change to the new site installation charge. The fee remains at \$4295 (ex gst)
- There is no change to the installation charge for new AOEI / GFM / RNG / MFWS (order management) machines. The fee remains at \$800 (ex gst)

### Domestic Access

- There is no change to domestic (Sydney and Melbourne) network bandwidth charges
- Domestic network bandwidth charges will be billed directly from the carrier to the Participant (i.e. they will not be included on the ASX provided invoice) – the date for this transition will be communicated during Q408

Monthly Charges	Billable Item	Billing Frequency	Charge (ex gst)
Australian (Syd and Mel CBD) network bandwidth charge	Site	Monthly	\$1,312
Australian (non Syd or Mel CBD) network bandwidth charge	Site	Monthly	On request
International CDB network bandwidth charge	Site	Monthly	\$1,850
International non-CDB network bandwidth charge	Site	Monthly	\$3,700
Network Infrastructure (router, hub, switches)	Site	Monthly	\$710
AOEI	Machine	Monthly	\$1,250
Generic Firm Manager (GFM) / MFWS (order management)	Machine	Monthly	\$250
RNG (Remote Network Gateway) - primary	Machine	Monthly	\$1,000
RNG (Remote Network Gateway) – back up	Machine	Monthly	\$500
AOEI / GFM / MFWS / RNG Installation charge	Machine	Once	\$800
Site construction charge	Site	Once	\$4,295

### SFE Market Access Invoice

Participants are advised that the invoice for access to SFE markets will be condensed to provide details of total infrastructure on the line items detailed above only. The invoice will not detail the location of equipment but rather the total amount of infrastructure controlled by the Participant. This change will be effective from December 08 when the invoice for SFE market access in November 08 will be distributed to Participants.
